

# PROTOTYPE & LOW VOLUME MACHINED CASTINGS

Griffin Industries offers expedited full-service manufacturing to OEMs across the globe. Our refined process enables us to minimize the time it takes to bring a new concept to market. Specializing in aluminum and iron sand casting process, we are able to simulate the permanent mold, die casting, and lost foam casting processes. As our customer you can expect:

- Dramatic Cost & Time Savings
- Advanced Machining Capability
- Emphasis on Precision & Accuracy
- Highly-Qualified Project Management

Next time you're looking to create a proven process for a new prototype design, consider working with Griffin Industries. Our team is eager to serve industry-leading innovators, like yourself. We have both the passion and skill set to provide valuable insight and produce iron and aluminum parts of the highest quality.
